

→ New Reward Fxs: - An Ablation Study

- 1) single MPD reward → worst ^{local} MPD penalized
- 2) localized group MPD reward → all local & reachable are considered
- 3) global group MPD reward
 - ↳ should see how all MPD allocation change
 - ↳ could learn more
 - ↳ Q) any other way this could work?
- 4) episode level reward → episode level pooling savings is the quantity to optimise for
- 5) consider PRBS...
- 6) consider removing static λ ...
- 7) how can we reduce episodes into sub-episodes?
- 8) ~~add~~ adding on to 4
 - ↳ use optimal algo. as proxy on how far the policy can go.
